PROFESSIONAL PROFILE

Junior Java Backend Developer with professional experience at Lumu Technologies and a strong background in microservices architecture projects using Spring Boot 3.x and Java 21. Specialized in designing and implementing REST APIs, security with Spring Security and JWT, data persistence with Spring Data JPA and Hibernate, and CI/CD pipelines using GitHub Actions and Docker. Additional experience in Python (Quart, FastAPI) and frontend development with React and TypeScript. Committed to clean code principles, comprehensive testing, and technical documentation in English.

PROFESSIONAL EXPERIENCE

LUMU TECHNOLOGIES | Software Developer – Intern *December 2024 – Junio 2025*

- Developed and maintained REST APIs in Python using the Quart framework, following best practices for design and documentation.
- Contributed to the frontend development of internal applications using React, TypeScript, and Material UI (MUI), implementing reusable components and functional improvements.
- Participated in collaborative development workflows using Git, Bitbucket, Jira, and Confluence within an Agile (Scrum) environment.
- Assisted in the maintenance, documentation, and continuous improvement of internal systems, helping optimize engineering team processes.

PROJECTS

SportsPulse API ⚙ **In Development** May - *2026*

Sports information management and tracking platform built as a modular monolith consisting of eight service modules following the MVC architecture pattern. Integrates the external Api-Football API to retrieve real-time sports data. Developed collaboratively using Scrum methodology and professional Git workflows.

Technologies: Java, Spring Boot, Spring Security, JWT, WebClient, PostgreSQL, Docker, GitHub Actions, REST APIs, Scrum.

GitHub: github.com/sebas679og/Equipo03-SportsPulseMS

SwissRoute API ✓ **Completed** *May - 2026*

REST API for planning and tracking trips within the Swiss public transportation network. Built with Java 21 and Spring Boot following the MVC architecture pattern, integrating the official Swiss Transport API to retrieve real-time data. Includes authentication with Spring Security and JWT, database migrations with Flyway, and API documentation using Swagger/OpenAPI.

Technologies: Java 21, Spring Boot 3.x, Spring Security, JWT, Flyway, PostgreSQL, MapStruct, Lombok, Docker, GitHub Actions, REST APIs.

GitHub: github.com/sebas679og/SwissRouteApi

BankCore System ✓ **Completed** February - *2026*

Java backend system built with MVC architecture for managing banking operations. The application consists of two modules (ms-customers and ms-accounts) organized within a single project. Implements REST APIs, persistence with Spring Data JPA, IBAN validation using MOD 97, and inter-service communication through WebClient.

Technologies: Java, Spring Boot, Spring Security, JWT, PostgreSQL, Docker, GitHub Actions, REST APIs, JUnit 5, Mockito.

GitHub: github.com/sebas679og/bankcore-system

Puzzle Decoder Race ✓ **Completed** June - *2025*

Technical challenge focused on concurrency and asynchronous processing in Python. Developed a concurrent solution to reconstruct messages from fragments retrieved from multiple HTTP endpoints with variable latency, optimizing response times through asynchronous workers.

Technologies: Python, AsyncIO, aiohttp, Docker, REST APIs.

GitHub: github.com/sebas679og/puzzle-decoder

EDUCATION

SENA | Software Analysis and Development Technologist *2023 – 2025*

SENA | IT Systems Technician *2021 – 2022*

SAN AGUSTÍN EDUCATIONAL INSTITUTION | High School Diploma *2022*

COURSES & CERTIFICATIONS

Database Development with MySQL — **SENA** *May 2026*

Google Cybersecurity Professional Certificate — **Coursera** *June 2025*

Introduction to JavaScript Programming — **Francisco José de Caldas District University – Generación TIC** *December 2023*

Digital Creative Industries — **UTP / Misión TIC 2022** *December 2022*

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Spring WebFlux/WebClient, Quart, FastAPI, React, Material UI (MUI)

Databases: PostgreSQL, MySQL, MongoDB

Testing: JUnit 5, Mockito, AssertJ, Testcontainers, WireMock, MockWebServer

DevOps & Tools: Docker, Docker Compose, GitHub Actions, CI/CD, Git, GitHub, Bitbucket, Jira, Confluence

Other Technologies: MapStruct, Lombok, Swagger/OpenAPI, JWT, Hibernate, REST APIs, Microservices, Concurrent Programming

Methodologies & Principles: Scrum, Clean Code, SOLID, MVC

SOFT SKILLS

Clear and effective communication | Teamwork | Analytical thinking | Proactivity | Adaptability | Fast learning | Time management | Creative problem-solving

LANGUAGES

Spanish: Native. **English:** B1 – Strong technical reading skills, technical documentation comprehension, and professional written communication.
